

### **"Nothings Wrong Song"** - Grace/Rives

This song comes from everything that went wrong in Nashville. All the lyrics written in the verses describe the negatives that occurred along my journey. The chorus shines a positive light on the difficult and trying experiences I have gone through. When things go wrong, this song inspires all who struggle to stay strong and not let anyone or anything bring you down, not anyone! A song people can turn to when life gets tough.

**"P.S."** - Grace/Robey We've all met that guy or girl that we feel a spark with. I met someone, felt that spark and I thought he was like no other man I had met before. I was smitten by his personality and charm and thought the feeling was mutual. It wasn't. I found out why. Listen carefully, the song tells the story.

**"Find a Way"** - Grace/Robey This story song came from various job displacements that happened on my journey. You can find yourself in a very dark negative place during difficult struggling times like these. My hope is that this song will motivate those who are unemployed and struggling to make ends meet to "Never Ever Give Up!" Keep filling out those applications and pursuing your interviews because something better lies ahead and you just don't know it yet! You will find a way! I did and you can too!

**"Feast or Famine"** - Grace/Robey This is a story line of things in life that can flourish in a moment, yet also can be taken away instantly. From my personal experience some days were golden and some days I just couldn't catch a break. When these things happen, just know you're going to be ok.

**"Grass is Greener"** - Grace/Robey I wrote this when I was real young over a young puppy love. It had a different title back then but we changed the title to a more modern situation that I could definitely relate to relationship/dating wise on my journey here in the South about a girl ditched from a significant other. He told her there are better fish in the sea and the grass is much greener than being with her. She then gets dressed up ready to show her face and have a "look at me now, you can't have me moment."

**"What Kind of Music"** - Grace/Robey I woke up with this song title in my head. This is about a girl studying for finals who sees a boy she doesn't know yet who is listening to his headphones while studying. She is wondering if they listen to the same music and have a commonality.

**"Sign Me Up"** - Grace/Robey This is a rocking party song, sign yourself up for a good time song. With everything that was going on I needed some fun in my life after all the obstacles, heartache, and pain I had encountered. Reflecting on all the fun times I had at the concerts in the summer back in my hometown in Nebraska and CMA Fest times set the scene for this fun time carefree song.

**"Never Got To Say Goodbye"** - Grace/Robey All of us have had loved ones leave us unexpectedly without saying goodbye. This is a ballad about a loved one or friend leaving to go to work, running errands, going on a vacation or whatever the circumstance may be and not knowing if you will ever see that person again. Shortly after the song was written I lost a good friend in a plane crash. It reminded me to never take any moment for granted with those we encounter in our lifetime.

**"Drink Him Gone"** - Grace/Rives A song about a girl who goes through a break up. She decides she's not going to get down and depressed over him so she goes to the best bar in town to put him out of her mind and drink him gone, not knowing who she will encounter at the bar.

**"You Can Overcome"** - Grace/Robey An inspirational song about a conversation between two people. One is in the dark losing hope and hitting rock bottom and the other is encouraging the other to be strong, hold on, rise up and overcome these difficult times in life. Keep your head up and keep pressing on because there are better days ahead. A song for everyone who encounters opposition and obstacles in life. Know and believe that "You Can Overcome" and you will!
